Spiridon – Theodoros Geropoulos is a software engineer, specialized in designing and managing IT solutions. He has studied Software Engineering at the Informatics department of the University of West Attica and got his MSc in Data Communication Systems from the Brunel University of London. Since 1992, he has worked as:

- A software designer and developer using CASE tools.

- A server administrator, specialized in Windows Servers.

- IT manager, in public and private sector organizations.

- An adult trainer on IT educational courses.

- A High School teacher on Computer Science.

- A researcher on educational technologies, software engineering and telemedicine research programs.

- A solution designer, for IT systems.

Currently, he is working as an IT manager at the Areteio University Hospital and as an adult trainer for vocational training. He is also an enthusiast for educational, promotional and travel videos and he is very fond of photography, videography, 4x4 offroad excursions and LEGO® modelling.
